Engineering a clear signature.

The approved geometric identity for Elyas Al Shaebi.

Deep Petrol. Copper. Warm Ivory. Precise forms with a forward motion.

Flat vector artwork is the official identity. Lighting is a presentation treatment.

One identity. Three forms.

Use the primary signature, bilingual lockup and app icon for distinct contexts.

Primary: personal signature. Secondary: bilingual introductions. Icon: compact surfaces.

Colour with purpose.

Keep the five official colours unchanged; choose readable text combinations.

Deep Petrol	Copper	Warm Ivory	Fog Gray	Slate
#0D4B52	#B8734C	#F6EFE6	#C9CED3	#3E4A54

Petrol / Ivory: 8.58:1. Use for body text, controls and important labels.

Copper / Ivory: 3.29:1. Reserve for accents or large text; avoid small labels.

Slate / Ivory: 7.96:1. Use for secondary body copy.

Dark theme: Petrol background, Ivory text. Fog Gray is for borders and muted text.

Typography and variants.

The custom ELYAS signature is artwork. Never replace it with a font.

Arabic: Hind Modern, regular 400 / medium 500 / bold 700.

English: Inter, regular 400 / medium 500 / bold 700.

Suggested web sizes: H1 48, H2 32, body 18, small 16 px. Line height: 1.6.

Reverse uses Ivory + Copper. Monochrome uses one solid colour throughout.

No fonts are bundled. Hind Modern requires a valid licence from its rights holder.
Outlined secondary artwork preserves the reference; editable text requires the licensed fonts.

Space, scale and integrity.

Protect the silhouette and the negative spaces that make the mark recognisable.

CLEAR SPACE

At least 1/2 the height of the primary E.

Primary minimum: 180 px / 40 mm. Secondary: 360 px / 80 mm.

Icon minimum: 16 px. Use icon-small.svg at 16 and 32 px, never the detailed icon.

Use: original aspect ratio, official colours, clear backgrounds, sufficient padding.

Avoid: stretching, rotation, recolouring, heavy shadows, cropping or moving elements.

Check at actual output size. Use the symbol alone when the full name becomes too small.

Ready for web and motion.

Canonical SVG masters drive all variants and exports.

master/: primary, secondary, icon and animation rig. All are real vector paths.

web/public/: logos, favicon, touch icons, Android icons, manifest and Open Graph.

Deploy web/public as one directory. Manifest icon paths are relative to that directory.

Link favicon.svg, favicon.ico, apple-touch-icon.png and site.webmanifest from your head.

web/brand.css + brand-tokens.json: opt-in theme variables; no global website restyling.

Animation: group-E, part-E-upper, part-E-lower, part-E-inlay; group-L/Y/A/S.

Signature sweep, two slashes, each surname letter and each lockup line are independent.

previews/motion.html tests entry animation and respects prefers-reduced-motion.

Reference limits: raster-derived text contours may retain subpixel differences.

The app lighting is intentionally separated from the official flat vector.
